El Gouna Hospital

RED SEA

I take great pleasure in welcoming you to El Gouna Hospital.

Established in 1998 , El Gouna Hospital; continuously improved to become the regions primary full- services medical center, offering comprehensive, integrated medical care in coordination with in-patient and out-patient centers minor and major surgery, critical and intensive care as well as prompt emergency response.

Located between Hurghada and Ras Gharib in the El Gouna resort, our state-of-the-art facility is specifically designed to serve residents and thousands of international visitors traveling to the Red Sea annually.

Our multi lingual medical staff represents a broad range of specialized treatment options as a result of modern diagnostic equipment, imaging facilities in addition to complete laboratory services.

El Gouna Hospital provides 24-hours emergency response services in compliance with international standards and procedures, insuring prompt and effective medical treatment within minimal time frame, preserving life on a daily basis.

The Hospital diving and hyperbaric clinic presents the most technologically advanced hyperbaric chamber in the Middle East to serve and ensure extended medical care to divers from around the globe.

Furthermore, specializing in internal medicine, cardiology, dentistry, pediatrics, neurosurgery, orthopedic surgeon, OB/GYN, and ophthalmology, e.t.c...

Our ten out-patient clinics offer a considerable variety in primary care.

The El Gouna Hospital plastic surgery center offers aesthetic treatments and plastic surgery representing the latest products and technologies.

From minor surgery to complex vascular improvement procedures to occupational health screening, El Gouna Hospital meets and exceeds all your medical needs with professionalism on ethical grounds.

We invite you to learn more about excellent services and facilities and will be honored to attend to any inquiries you may have.

Dr. Medhat Milad Salib
General Manager
CEO El Gouna Hospital Comp.

Welcome to El Gouna Hospital, a state-of-the-art medical center providing integrated medical services.

Mission Statement

El Gouna Hospital aims to provide integrated medical service of extraordinary standard supported by advanced technology, professionalism and specialized staff in a nurturing environment to meet and exceed the patients' medical needs.

Emergency Response Dept.

El Gouna Hospital's emergency response team facilities accommodations to provide excellent medical care in coordination with modern diagnostic procedures 24 hours a day. Divided in ambulatory services and clinical emergency treatment, we offer four modern mobile Intensive Care Units and direct access to our Emergency Room. Under paramedic supervision, the emergency response team ensures prompt response paired with full-scale life preserving treatment at the scene. Our physicians and emergency technicians are available and prepared to sustain and master even high volume situations at all times. Supported by the International Red Cross.

Intensive Care Unit (ICU)

Our multidisciplinary facility offers advanced cardiac and respiratory life support to our patients in critical conditions. Equipped with modern technology, our Intensive Care Units treat Polytraumata, internal as well as surgical patients with undivided supervision. All units include perfusors, beside monitors, defibrillator, portable X-Ray, ventilators and blood gas analysis station. Hygienic standards are top priority ensuring the safest environment to promote healing for our patient combined with medical expertise.

Operating Theatres

The Hospital has three operating theatres that represent the very latest in design and technology by world-renowned operating theatre company, Maquet. The theatres are fully equipped for major surgical procedures and have a specialized recovery suite. The theatres and recovery suite have independent air conditioning systems with 0% re-circulation and bacterial filters. Walls and ceilings are covered with stainless steel and antistatic floors.

Cardiac Care

El Gouna Hospital has the newest and most advanced cardiac facility in the Red Sea area, with a full range of cardiovascular diagnostics including cardiac enzymes, echocardiography and exercise testing. Treatment is supervised by a leading specialist in the cardiology field.

Haemodialysis Center - Diagon

With 4 B. Braun Machines in a luxury Room with remote controlled bed, Internet and telephone access with audio and dish facility; all that in a day lighted room in the most beautiful area in El Gouna.

All this is under supervision of Prof./Dr. Rashad Barsom, M.D., FRCP, FRCPE, Prof. of Medicine, Cairo University, Chairman of Cairo Kidney Center with his team work from Cairo Kidney Center (CKC).

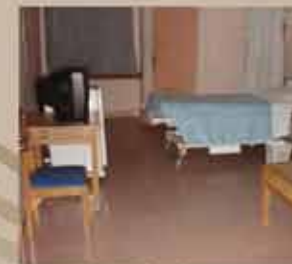

El Gouna Hospital provides comprehensive, integrated health care and emergency services.

Surgery

El Gouna Hospital's resident surgeons and specialist consultants, supported by modern diagnostics, operating theatres and ICU, provide the best option for minor and major surgical procedures in Egypt. In addition to general and emergency surgery, the latest non-invasive diagnostic and treatment procedures, including laparoscopy and endoscopy, are available.

In-Patient Department

The modern 30-bed In-Patient Department has private and shared rooms designed to provide the highest levels of comfort and safety. All rooms are air-conditioned and equipped with patient communication systems and televisions broadcasting channels in English, Arabic, Italian, Dutch, Polish, French and Russian. Nutritional needs are met by the hospital's own cafeteria offering healthy international and local cuisine. Our highly trained and professional nursing staff is committed to meeting the needs of each patient, providing effective treatment and a high standard of care.

Out-Patient Services

The Out-Patient sector provides comprehensive integrated medical services covering a broad range of primary and preventive care. The department also provides a variety of health screening programs for high – risk employees such as food processors, oil and construction laborers and diving instructors.

Our dedicated staff and specialists are supported by the hospital's modern diagnostic services.

The hospital currently holds 10 Out-patient Clinics in the following specializations: Obstetrics and Gynecology, Dentistry, Pediatrics and Neonatology, Ear, Nose and Throat, Cardiology, Internal Medicine, Ophthalmology, Urology, and Orthopaedics.

Coming soon: Diet and Nutrition Center, Acupuncture, Physiotherapy, and Natural Medicine.

Orthopedics

El Gouna Hospital offers outstanding orthopedic services and has a talented orthopedic surgeon on staff. Conventional X-ray, CT scan and MRI facilitate orthopedic diagnoses.

Plastic Surgery Center

Founded by internationally trained aesthetic and reconstructive surgeons, Dr. Heba Hussein and Dr. Hassan About Seoud, the ultramodern Plastic Surgery Center offers a wide-range of major and minor surgeries, injectibles and one-day procedures representing the cutting edge of product and procedure. An expanding clientele has already discovered the financial, health and recuperative benefits of the relaxed and beautiful environment of El Gouna and the added safety and comfort of the Center's location within El Gouna Hospital's top quality health care facility.

Procedures include:

- Facial Surgery
- Tummy Tuck
- Botox Injections
- Blepharoplasty
- Face Filler Injections
- Eyelid Surgery
- Body Sculpting
- Breast Augmentation
- Midface Lifting
- Liposuction
- Neck Lifting
- Rhinoplasty

Neurosciences

El Gouna Hospital has several outstanding physicians specialized in neurology and neurosurgery. The Emergency Department offers the area's only stroke unit including an emergency physician, CT technician, MRI technician, radiologist, pharmacist and neurologist providing immediate and systematic treatment of strokes with the goal of minimizing debilitation.

Obstetrics

Mothers and newborns are treated with extra care by our resident obstetrician, pediatrician and neonatologist. The Obstetrics Unit includes birthing suites with labor, delivery, recovery, and postpartum care and a technologically advanced nursery to care for both well and sick infants.

Diagnostics

El Gouna Hospital provides complete imaging facilities including the most advanced MRI CT scanner, ultrasonography, echocardiography, colored Echo Doppler, stationary and portable conventional X-Ray and diagnostic GIT endoscopy. The fully automated laboratory provides a wide range of diagnostic testing in emergency and non-emergency cases, with quick and accurate results and also contains the area's only blood gas analysis machine.

Magnetic Resonance Imaging Dept. (MRI)

As a new asset to our Imaging Center we are proud to announce the opening of our Magnetic Resonance Imaging facility. With this MRI we provide access to develop even more concise images of the area in question and therefore raise the availability to conduct comprehensive examinations in as little as 20-30 minutes per patient.

Keeping the ominous idea of claustrophobia in mind, we present an **open MRI**, to keep the patients strain at a minimum at all time. With the Magnetic Resonance Imaging technology our physicians and specialist technicians possess the ability to diagnose the early stages of strokes, devaluate masses in soft tissue and visualize joint injuries. At present time, our MRI remains the first and only Magnetic Imaging Center in the entire Red Sea region.

Pharmacy and Beauty Center

Our in-house Pharmacy and Beauty Center serves the hospital and surrounding community with a complete stock of popular and specialized medicines and a full line of quality health and beauty aids.

Cafeteria

El Gouna Hospital Cafeteria serves the hospital community with healthy meals and snacks featuring international and local cuisine.

Specially trained personnel and specialists are permanently on staff.
